

Specification AD 8086

Ice cube maker AD 8086
HIGH EFFICIENCY - the ice maker produces 12 kg of cubes per day. The first portion of ice (9 cubes) is ready from 9 to 13 minutes after starting the machine. Saving time and money

Transparent lid - The flap is equipped with a transparent cover, thanks to which you can monitor the stage of the prepared ice without having to turn off the device.

Number of ice cubes per cycle: 9

Information about the lack of water - the device will inform you when you need to refill the water, without the need to control the water level

Ice tank full indicator - the device has a tank collecting prepared ice with a capacity of 0.6 kg - when this tank is full, the ice maker will let you know that it needs to be emptied

Automatic cleaning - it will allow you to regularly and conveniently clean the device, just enable this option and after a few minutes the device is ready for further operation

Power: 100 W
Water tank capacity: 1.5L
Daily ice output: 12kg/24 hours
Ice storage capacity: 1.5L/600g
Refrigerant: R600a / 20g
Max overall dimensions (W×D×H): 228X320X297mm
Device Weight: 7.7kg
Length of power cable: 117 cm
Power cable color: Black
Device color: Silver
Device body material: Plastic
